**SUBJECT: Draft Airport Master Plan
Newport State Airport (Colonel Robert F. Wood Airpark)**

Dear Sir or Madam:

On behalf of the Rhode Island Airport Corporation and The Louis Berger Group please find enclosed one (1) copy of the Draft Airport Master Plan for the Newport State Airport (Colonel Robert F. Wood Airpark) for public comment and review.

A public information meeting will be held on Thursday, November 15, 2007 from 6pm – 8 pm in the Middletown Town Hall. This is an opportunity to share the findings of the planning study with the public. It also affords the public with an opportunity to present their written or oral statements.

The public comment period for the Draft Airport Master Plan will remain open until Thursday, November 29, 2007.

For more information, or to send written comments, please contact myself at 20 Corporate Woods Blvd., Albany, NY 12211 or call 518.432.9545.

Sincerely,
THE LOUIS BERGER GROUP, INC.

Marc C. Champigny
Project Manager

TABLE OF CONTENTS

CHAPTER 1.0 – BASELINE CONDITIONS

1.1	Introduction	1-1
1.2	Inventory of Airfield Conditions	1-6
1.3	Inventory of Operational Activity	1-24
1.4	Environmental Overview	1-28
1.5	Inventory of Economic Conditions	1-49

CHAPTER 2.0 – AIRPORT ROLE AND FORECASTS

2.1	Forecast Methodologies and Data	2-1
2.2	Demand Factors	2-12
2.3	Activity Forecasts.....	2-14
2.4	Airport Role.....	2-19
2.5	Recommended Forecast and Summary	2-22

CHAPTER 3.0 – FACILITY REQUIREMENTS

3.1	Airport Runway and Taxiway System Analysis	3-2
3.2	General Aviation (GA) and Support Facilities	3-15
3.3	Summary of Airport Facility Requirements	3-21

CHAPTER 4.0 – ALTERNATIVES ANALYSIS

4.1	Airport Runway System Alternatives.....	4-2
4.2	Airport Taxiway System: Parallel Taxiway Construction Alternatives	4-6
4.3	Airport Taxiway System: Parallel Taxiway Construction Alternatives	4-11
4.4	Airport Terminal, Hangar, and Support Facilities	4-15
4.5	T-Hangar Alternatives.....	4-18
4.6	Other Airside and Landside Issues.....	4-23
4.7	Airport Performance.....	4-26
4.8	Airport Alternatives Matrix.....	4-29
4.9	Preferred Alternative and Conceptual Airport Layout Plan.....	4-29

CHAPTER 5.0 – ENVIRONMENTAL REVIEW

5.1	Noise Impacts	5-1
5.2	Land Use	5-2
5.3	Air Quality	5-2
5.4	Water Quality	5-3
5.5	U.S. Department of Transportation Act Section 4(f) Lands	5-5
5.6	Historic, Architectural, Archaeological, and Cultural Resources	5-5
5.7	Biotic Communities	5-6
5.8	Threatened or Endangered Species of Flora and Fauna	5-6
5.9	Wetlands.....	5-6
5.10	Floodplains	5-7
5.11	Coastal Zone Management	5-7
5.12	Coastal Barriers.....	5-7

5.13	Wild and Scenic Rivers.....	5-8
5.14	Farmland	5-8
5.15	Energy Supply and Natural Resources.....	5-8
5.16	Light Emissions.....	5-8
5.17	Solid Waste Impact.....	5-8
5.18	Environmental Justice.....	5-9
5.19	Summary	5-9

CHAPTER 6.0 – AIRPORT LAYOUT PLAN

6.1	Airport Layout Plan Drawing Set.....	6-1
6.2	Title Sheet	6-1
6.3	Existing Airport Facilities Plan.....	6-1
6.4	Airport Layout Plan	6-1
6.5	Runway Plans and Profiles.....	6-2
6.6	FAR Part 77 Surfaces Plan.....	6-2
6.7	Terminal Area Plan.....	6-2
6.8	Airport Zoning Plan.....	6-3

CHAPTER 7.0 – IMPLEMENTATION PLAN

7.1	Capital Improvement Program.....	7-1
7.2	Financial Plan	7-6

TABLE OF APPENDICES

APPENDIX A – GLOSSARY OF TERMS

APPENDIX B – AIRPORT ADVISORY COMMITTEE MEMBERS, MEETING MINUTES, AGENDAS, AND SIGN-IN SHEETS

APPENDIX C – PROJECT WORK SCOPE, PUBLIC INFORMATION MEETING PRESENTATIONS, SIGN-IN SHEETS, AND COMMENTS

APPENDIX D –PUBLIC ADVERTISEMENTS AND ARTICLES

APPENDIX E – STANTEC PART 77 OBSTRUCTION STUDY REPORT

APPENDIX F – AIRPORT SURVEYS

APPENDIX G – U.S. FISH & WILDLIFE LETTER

TABLE OF TABLES

TABLE NO.

1.0	Airport Improvement Projects	1-3
1.1	UUU Runway Inventory	1-7
1.2	UUU Taxiway Inventory	1-7
1.3	Airport Businesses.....	1-14
1.4	Airport Buildings.....	1-15
1.5	Airport Equipment.....	1-16
1.6	Approach Categories	1-20
1.7	UUU Approach Categories	1-20
1.8	UUU Part 77 Surfaces	1-24
1.9	Annual Historic Aircraft Operations.....	1-25
1.10	Historic Local vs. Itinerant Aircraft Operations	1-25
1.11	2006 Based Aircraft Fleet Mix Percentage	1-26
1.12	Newport Historical Based Aircraft	1-26
1.13	Newport Historical Fuel Sales.....	1-26
1.14	Net Income – Newport State Airport	1-59
2.1	Airports Surrounding the UUU Service Area.....	2-3
2.2	Population Forecast – Newport Airport Service Area.....	2-5
2.3	Area Employment – State of Rhode Island.....	2-6
2.4	U.S. Economic Long-Term Forecast.....	2-7
2.5	2006 FAA Terminal Area Forecast – State of Rhode Island	2-8
2.6	FAA – U.S. Active General Aviation and Air Taxi Aircraft Forecast	2-9
2.7	First Nine Months Shipment of Airplanes Manufactured Worldwide	2-10
2.8	Historical General Aviation Shipments.....	2-10
2.9	Projection of General Aviation Operations – RIASP	2-11
2.10	Airport Survey Results: Airport Limitations	2-12
2.11	Airport Survey Results: Airport Positives	2-13
2.12	Annual Historical Aircraft Operations, Based Aircraft, & Operations per Based Aircraft	2-15
2.13	Forecasting Scenario One: Baseline	2-16
2.14	Forecasting Scenario Two: High Growth	2-17
2.15	Forecasting Scenario Three: Medium Growth	2-17
2.16	UUU Forecast Summary.....	2-17
2.17	Based Aircraft Fleet Mix Forecast.....	2-18
2.18	10-Year Monthly Aircraft Operations at UUU.....	2-18
2.19	Based and Transient Aircraft Types and ARC's.....	2-20
2.20	Summary of Recommended Forecasts	2-22
3.1	B-II Design Standards.....	3-3
3.2	B-II Operational Safety Standards	3-3
3.3	Previous ASV Calculations	3-4
3.4	UUU Demand to Capacity Ratio	3-4
3.5	10 Knot Wind Analysis – Percent Coverage	3-5
3.6	13 Knot Wind Analysis – Percent Coverage	3-5
3.7	Aircraft Runway Length Analysis	3-7

3.8	Runway Length Requirements – UUU Representative Analysis.....	3-8
3.9	UUU Runway Design Standard Compliance.....	3-9
3.10	UUU Runway/Taxiway Pavement Condition.....	3-9
3.11	Approach Procedure with Vertical Guidance – Approach Requirements.....	3-12
3.12	Non-Precision Approach Requirements.....	3-13
3.13	UUU Approach Requirement Comparison.....	3-14
3.14	General Aviation Terminal Building Area Requirements.....	3-15
3.15	Recommended Terminal Building Area Requirements.....	3-15
3.16	Based Aircraft Apron Parking Requirements.....	3-17
3.17	Itinerant Aircraft Apron Parking Requirements.....	3-18
3.18	Based and Itinerant Aircraft Apron Parking Requirements.....	3-18
3.19	Fuel Storage Requirements for UUU.....	3-19
3.20	Summary of Airport Facility Requirements.....	3-21
4.1	Runway Alternatives Analysis.....	4-4
4.2	Taxiway Alternatives Analysis.....	4-8
4.3	Apron Area Alternatives Analysis.....	4-13
4.4	Conventional Hangar and General Aviation Terminal Alternatives Analysis.....	4-16
4.5	T-Hangar Alternative Analysis.....	4-20
4.6	Alternatives Analysis Summary Matrix.....	4-29
6.1	Preferred Alternative Projects.....	6-2
7.1	Phase I Estimated Project Costs and Priority.....	7-2
7.2	Phase II Estimated Project Costs and Priority.....	7-3
7.3	Phase III Estimated Project Costs and Priority.....	7-4
7.4	Summary of Estimated Project Costs.....	7-6

TABLE OF FIGURES

FIGURE NO.

1.0	Airport Vicinity Map.....	1-4
1.1	UUU Aerial Photo	1-5
1.2	UUU Existing Airport Layout	1-6
1.3	Pavement History and Condition Plan	1-9
1.4	NAVAID/Lighting History and Condition Plan.....	1-13
1.5	Airspace Classifications	1-17
1.6	Typical FAA Part 77 Imaginary Surfaces	1-19
1.7	Localizer Runway 22	1-21
1.8	VOR/DME or GPS Runway 16	1-22
1.9	10-Year Historical Activity Newport State Airport 1997 to 2006	1-27
1.10	Airport Location Map.....	1-30
1.11	Airport Zoning	1-31
1.12	Airport Drainage Areas	1-34
1.13	Wetlands.....	1-37

5.2	Middletown Watershed Protection District – Zone 1	5-11
5.3	Farmland Protection Policy Act Soils	5-12
6.1	Title Sheet	6-4
6.2	Existing Airport Facilities.....	6-5
6.3	Airport Layout Plan	6-6
6.4	FAR Part 77 Imaginary Surfaces	6-7
6.5	Terminal Area Plan.....	6-8
6.6	Airport Zoning Plan.....	6-9

Introduction to the Study

Updating an Airport Master Plan (AMP) is a standard industry practice. The need may be developed based on some dramatic change at the airport, but as a “rule of thumb” the Federal Aviation Administration (FAA) suggests that updates should be considered approximately every five years to maintain the currency of the data, the airport standards and reassess airport needs.

The airport master plan has basically two components; the report which documents the analytical process and the Airport Layout Plan (ALP), which serves as the graphic representation for future development at the airport. It is the ALP which is approved by the FAA and the airport sponsor, in this case the Rhode Island Airport Corporation (RIAC).

In the case of Newport State (Colonel Robert F. Wood Airpark) Airport (UUU), the last airport master plan study was conducted in 1986, twenty years ago. Even more dramatic is that the 1986 airport master plan did not produce an approved Airport Layout Plan (ALP). The “most current” FAA ALP dates back to 1966, over 40 years ago.

Therefore, the development of this AMP and ALP is essential to establish an understanding of the future direction of the airport. This updated planning document will be used by RIAC and FAA to direct implementation of capital improvement projects at UUU from the short term (5 year) through the long term (20 year) planning period. In addition to meeting the needs of the airport created by the projected demand it will determine the ability of UUU to meet FAA design standards, which have changed since the last approved ALP and how best to bring the facilities that do not meet those criteria up to standard. Alternative use of the AMP is to serve as a guide for RIAC when reviewing private investment at airport. Similarly it can be effective for the Town of Middletown when reviewing land use development around the airport to ensure compatibility with FAA airspace requirements and the environment.

The planning activity that was involved with this project was defined by a scope of work, which followed the guidelines provided by the FAA Advisory Circular 150-5070-6B, *Airport Master Plans*. The objectives of the study were to:

- Create an effective coordination and communication process to ensure input from all affected parties.
- Prepare a comprehensive inventory of airport and environmental conditions;
- Develop forecasts to assess the airport role and facility requirements;
- Conduct a comprehensive assessment of the Airport’s ability to meet current FAA design standards;
- Conduct an alternative analysis to consider the engineering, operational, environmental and financial factors;
- Identify the recommendations that result from the alternatives analysis; and
- Prepare and approve a new Airport Layout Plan.

The first objective was achieved through the creation of an Airport Advisory Committee (AAC) that was established to discuss and provide comments on technical reports and recommendations developed during the planning process. Membership of the AAC represented a broad range of stakeholders, including airport users, local business, the community, and planning agencies. A copy of the AAC membership and their roles and responsibilities is included in Appendix B.

In addition to 8 AAC meetings, public information meetings (PIM) were held at two key points in the process (after the draft forecasts were developed and after completion of the draft AMP and ALP). The purpose of the PIM is to provide the general public with the opportunity to learn about the study and provide input into the process. Notification of these meetings was provided by publishing notices in local newspapers. The Minutes of all these meetings are included in Appendix B. Finally, an airport website was created to provide project information including draft working papers, public notices, and the scope of work.

This Airport Master Plan was prepared and is presented in the following Chapters:

Chapter 1 – Baseline Conditions

Chapter 2 – Airport Role and Forecasts

Chapter 3 – Facility Requirements

Chapter 4 – Alternatives Analysis

Chapter 5 – Environmental Review

Chapter 6 – Airport Layout Plan

Chapter 7 – Implementation Plan

Appendices

The Airport Master Plan report was prepared by The Louis Berger Group, Inc. and the following staff participated in the study:

Project Manager:

Mr. Marc Champigny, Assistant Director of Aviation

Assistant Project Manager:

Ms. Danielle DelBalso, Aviation Planner

Planning/ALP/Graphics/CAD:

Mr. Dan Porter, Assistant Director of Aviation

Mr. David Sperling, Assistant Director of Aviation

Mr. Nicholas Stefaniak, Aviation Planner

Environmental:

Mr. Doug Ganey, Sr. Environmental Scientist

Engineering:

Mr. Andy Chiurazzi, P.E.

Mr. Douglas Fox, P.E.

The Project Management Team also included Mr. Vincent Scarano, RIAC, Project Manager and Ms. Gail Lattrell, FAA, Community Planner.
